- The claimed subject-matter is not novel in view of the disclosures of D1-D3 (Art. 33(2) PCT); see the passages cited in the search report.
- 3.1 In particular, D3 discloses that PKC412, a.k.a. Midostaurin (cf. present description, page 35, paragraph 4; claims 10, 12, 13, 19) is effective in vivo in overcoming resistance to imanitab in a murine model of FIP1L1-PDGFRα-induced myeloproliferative diseases.
- 3.2 Notwithstanding the objections made in view of D3, the claims to products and first medical uses (claims 12 and 19) also lack novelty because Midostaurin was already known as a medicament at the claimed priority date.
- There would not appear to be any novel subject-matter in the present set of claims which could be considered as being inventive (Art. 33(3) PCT).

#### Section VIII

- 6. The objections raised in the search report to the clarity of claims 1-5, 8, 10, 12, 13 and 19-21 is upheld (Art. 6 PCT).
- 7. The expressions "lower alkyl", "lower alkoxy" etc. are unclear because there is no generally accepted interpretation for the maximum number of carbon atoms which the definition "lower" is intended to encompass.
- 8. Claim 15 is unclear because claims 10-12 do not relate to methods.
- The category of claim 20 is unclear because the applicant is attempting to claim an article of manufacture in terms of its method of use.
